What this module is

Implementation module in verae-activate. The tables below are extracted from the source (signatures + JSDoc).

Exports

type, fields, key, required, false, label, helpText, Later, https

Types / interfaces / classes

None extracted.

Functions

· Name · Parameters · Param types (JSDoc) · Returns · Calls (same file / helpers) ·
· ----- · ----- · ----- · ----- · ----- ·
· testAuth · z, bundle · z: object, bundle: object · Promise<{ok: boolean, mode: string, label: string — >} · see Call graph ·

What it imports / requires

No imports detected.

Call graph (identifiers invoked)

async, replace, request

Each identifier is a call site in this file. Follow the import list to see the defining module; open that module's MD for parameter and return types.

Return values (how to read this)

- HTTP route handlers return Express `res.json(...)` bodies (see route docs).
- Zapier perform functions return a **single object** (creates) or an **array** (triggers/searches).
- Pricing functions return integer **cents** on `Quote.totalCents`.
