What this module is

Implementation module in verae-activate. The tables below are extracted from the source (signatures + JSDoc).

Exports

key, noun, display, label, description

Types / interfaces / classes

None extracted.

Functions

· Name · Parameters · Param types (JSDoc) · Returns · Calls (same file / helpers) ·
· ----- · ----- · ----- · ----- · ----- ·
· toFiniteNumber · value, name · value: unknown, name: string · number · see Call graph ·
· perform · z, bundle · z: object, bundle: object, bundle.inputData: object, bundle.inputData.number1: string ·
number, bundle.inputData.number2: string · number, bundle.authData: object · Promise<{number1: number,
number2: number, sum: number, mode: string — >} · see Call graph ·

What it imports / requires

No imports detected.

Call graph (identifiers invoked)

number2, toFiniteNumber, isFinite, async, replace, request

Each identifier is a call site in this file. Follow the import list to see the defining module; open that module's MD for parameter and return types.

Return values (how to read this)

- HTTP route handlers return Express `res.json(...)` bodies (see route docs).
- Zapier perform functions return a **single object** (creates) or an **array** (triggers/searches).
- Pricing functions return integer **cents** on `Quote.totalCents`.
