What this module is

Implementation module in verae-zapier-middleware. The tables below are extracted from the source (signatures + JSDoc).

Exports

authenticate

Types / interfaces / classes

None extracted.

Functions

No top-level functions extracted.

Methods (class / object)

· Name · Parameters ·

· ----- · ----- ·

· next · (none) ·

What it imports / requires

- ../lib/tokens.js
- ../services/authService.js
- ../errors.js
- ../debug/logger.js

Call graph (identifiers invoked)

createDebugger, asyncHandler, async, extractBearerToken, resolveAuthContext, debug, next

Each identifier is a call site in this file. Follow the import list to see the defining module; open that module's MD for parameter and return types.

Return values (how to read this)

- HTTP route handlers return Express `res.json(...)` bodies (see route docs).
- Zapier perform functions return a **single object** (creates) or an **array** (triggers/searches).
- Pricing functions return integer **cents** on `Quote.totalCents`.
