What this module is

Implementation module in verae-zapier. The tables below are extracted from the source (signatures + JSDoc).

Exports

key, noun, display, label, description

Types / interfaces / classes

None extracted.

Functions

· Name ·	· Parameters ·	· Param types (JSDoc) ·	· Returns ·	· Calls (same file / helpers) ·
· ----- ·	· ----- ·	· ----- ·	· ----- ·	· ----- ·
· base ·	· (none) ·	· — ·	· unknown ·	· see Call graph ·
· perform ·	· z, bundle ·	· — ·	· unknown ·	· see Call graph ·

What it imports / requires

No imports detected.

Call graph (identifiers invoked)

async, split, map, trim, filter, request, base, timestamping

Each identifier is a call site in this file. Follow the import list to see the defining module; open that module's MD for parameter and return types.

Return values (how to read this)

- HTTP route handlers return Express `res.json(...)` bodies (see route docs).
- Zapier perform functions return a **single object** (creates) or an **array** (triggers/searches).
- Pricing functions return integer **cents** on `Quote.totalCents`.
