What this module is

Implementation module in verae-zapier-middlewre. The tables below are extracted from the source (signatures + JSDoc).

Exports

setDebugTestSink, formatLogLine, createDebugger

Types / interfaces / classes

None extracted.

Functions

· Name · Parameters · Param types (JSDoc) · Returns · Calls (same file / helpers) ·

· ----- · ----- · ----- · ----- · ----- ·

· setDebugTestSink · sink · sink: null · ((line: string) => void) · void · see Call graph ·

· formatLogLine · { level, namespace, message, meta, traceId } · parts: object, parts.level: string, parts.namespace: string, parts.message: string, parts.meta: Record<string, unknown> · undefined, parts.traceId: string · null · string · see Call graph ·

· emit · line, filePath · line: string, filePath: string · null · void · see Call graph ·

· createDebugger · namespace · namespace: string · Debugger — Logger with debug/info/warn/error methods. · see Call graph ·

· write · level, message, meta · level: 'debug' · 'info' · 'warn' · 'error', message: string, meta: Record<string, unknown> · unknown · see Call graph ·

What it imports / requires

- node:fs
- ./config.js
- ./redact.js

- ./trace-context.js

Call graph (identifiers invoked)

setDebugTestSink, formatLogLine, toISOString, keys, stringify, redact, toUpperCase, emit, testSink, error, appendFileSync, createDebugger, debug, toLowerCase, write, loadDebugConfig, shouldLog, getTraceId

Each identifier is a call site in this file. Follow the import list to see the defining module; open that module's MD for parameter and return types.

Return values (how to read this)

- HTTP route handlers return Express res.json(...) bodies (see route docs).
- Zapier perform functions return a **single object** (creates) or an **array** (triggers/searches).
- Pricing functions return integer **cents** on Quote.totalCents.
