What this module is

Implementation module in verae-zapier-middleware. The tables below are extracted from the source (signatures + JSDoc).

Exports

connectNats, ensureStreams, closeNats, getJetStream, isNatsConnected

Types / interfaces / classes

None extracted.

Functions

· Name · Parameters · Param types (JSDoc) · Returns · Calls (same file / helpers) ·

· ----- · ----- · ----- · ----- · ----- ·

· connectNats · url = config.natsUrl · url: string · Promise<{ nc: import('nats').NatsConnection, js: import('nats').JetStreamClient, jsm: import('nats').JetStreamManager — >} · see Call graph ·

· ensureStreams · manager · manager: import('nats').JetStreamManager · Promise<void> · see Call graph ·

· closeNats · (none) · — · Promise<void> · see Call graph ·

· getJetStream · (none) · — · import('nats').JetStreamClient · null · see Call graph ·

· isNatsConnected · (none) · — · boolean · see Call graph ·

What it imports / requires

- ../debug/logger.js
- ../config.js
- ./subjects.js

Call graph (identifiers invoked)

createDebugger, import, connectNats, debug, disabled, info, connect, jetstream, jetstreamManager, ensureStreams, add, closeNats, drain, getJetStream, isNatsConnected, isClosed

Each identifier is a call site in this file. Follow the import list to see the defining module; open that module's MD for parameter and return types.

Return values (how to read this)

- HTTP route handlers return Express `res.json(...)` bodies (see route docs).
- Zapier perform functions return a **single object** (creates) or an **array** (triggers/searches).
- Pricing functions return integer **cents** on `Quote.totalCents`.
